**Subject:** RE: APP/20/00833 Power Generation Facility, Southmoor Lane, Havant, PO9 1JW

Hello David

The development highlights the loss of 7 category C trees (not particularly high quality trees that should not be a constraint for development). These trees are inside the site amongst the existing containers and hard standing.

The revised plan shows the trees located offsite within a landscape strip to now be retained, and the LMS includes native tree and hedgerow planting that strengthen the wooded strip. This is the key to the site sustainability in my view and allows for the verdant character to remain in this part of the area – mainly a commercial / industrial setting.

There is space for new tree planting that can establish alongside the development and this should be discussed with our colleagues in CELT.

If the AMS and TPP are conditioned as part of an approved scheme and mitigation planting is agree then I would raise no objection on arboricultural grounds.

Thanks  
J
