

I have reviewed the Preliminary Bat Roost Assessment by Arb tech (Nov 2020).

The building was considered to have negligible suitability to support roosting bats. As such I would raise no concerns over this proposal.

The ecologist has made recommendations for enhancements, and I would agree with the recommendation for the installation of a bat brick as described in Section 4.2 Table 8.

Please let me know if you have any queries.

Kind Regards

Rebecca Harvey

Ecologist
