14 December 2020

Dear Strategic Planning,

Town and Country Planning Act 1990 (as amended).
Application for the Variation of Condition 2 of Planning Permission 02/67492/000 for a time extension, for the Environmental Control Compound, to 2030.
Southleigh Landfill Site, Emsworth Common Road, Havant.

I am pleased to submit our planning application via the planning portal for the above proposed development.

Background

Southleigh Landfill Site has been active since the early 1980s when Hoggins was extracted. The site is restored and currently in aftercare. The Environmental infrastructure remains on site as there is an ongoing requirement to manage landfill gas and leachate.

The Application

Condition 2 of planning permission 02/67492/000 states:

'The permission hereby permitted shall be for a temporary period expiring on 31 December 2020 or when the plant, buildings or equipment are no longer required, whichever is the sooner. Within six months of the cessation of use of the site all plant, buildings, machinery and hardstandings shall be removed'.

Reason: In the interests of the amenities of the area.

The application seeks revision to Condition 2 to provide a 10 year extension to the current temporary period creating a new end date of the **31st December 2030**. Although landfill gas extraction and leachate management will likely extend beyond this date, Veolia are happy to review the end date, again, in 10 years to then establish how much longer the infrastructure will be required for.

We look forward to a positive outcome in relation to this application.

Yours sincerely

Simon McKee
