

I have been alerted by a friend to the demolition of 9 East Street and the building of 10 supported living units in its place.

As a retired social care worker and a resident in Havant Borough Council area I wish to stress the importance of thorough consultation with all stakeholders e.g. Social Care, relevant vol orgs etc., to ensure that this project will enable all the needs - physical, emotional, social and educational/employment - of its tenants to be met by the local community and services. It is also important that the layout of the building has been carefully planned to be flexible in meeting a variety of needs.

It may be that this is all in hand but this is not obvious from the public information available.

Thank you for your consideration
