

Dear Mr Toole, I am writing yet again to formally object to the most recent amendment of the Planning Application for 25 Charlesworth Drive, Waterloooville. I am amazed that there has been yet another amendment to the plans, which is at least the 5th or 6th change to the design. It is quite obvious that the developer has not been truthful or accurate with any plans to date, and cannot be trusted to follow the defined plans if this Application is granted. Even so the plans are still not correct as the windows already installed do not match the plan. Basically with so many objections to this plan and all previous Applications, this must yet again be rejected. In summary, Charlesworth Drive is a residential area of single level Bungalows, and therefore this monstrous design of large side dormers it not acceptable as it will have a major impact on the outlook of the area, effect on daylight and privacy to the adjacent & opposite properties, and the design and appearance is inappropriate for a Bungalow. If the developer wishes to use the roof space to extend they should do this by way of velux windows which have been used by numerous properties in the area without any effect to the neighborhood. Please remember that this plan is still intending to use space in the illegal two storey extension at the rear of the property. If this Planning Application is granted it will make a mockery of all Regulations, Processes & Procedures, associated with Property Development, therefore it must be rejected once again
