

Application – APP/20/00643

Site: 22 King Street, Emsworth

**Proposal – Demolition of existing conservatory, erection of single storey rear extension.
Alterations to fenestration and new balustrade to existing balcony parapet.**

The site is not Listed, but is within the Emsworth Conservation Area, centred on Emsworth's old town and port.

Legislative and Policy Context

When assessing the proposal, the following legislation and policy context is taken in consideration.

Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires planning authorities, when considering whether to grant planning permission for development which affects a listed building or its setting, to have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.

Section 72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires planning authorities, when considering whether to grant planning permission for development which affects a Conservation Area, to have special regard to the desirability of preserving or enhancing the character and appearance of that area.

The revised National Planning Policy Framework (NPPF) was published in February 2019 and sets down the policies that the Council must take into account when determining planning applications. The 'Historic Environment Good Practice Advice in Planning Note 2', states at paragraph 4:

'The significance of a heritage asset is the sum of its archaeological, architectural, historic, and artistic interest' and provides at paragraphs 8, 9 and 10 that in order for the Local Planning Authority to make decisions in line with legal requirements, the objectives of the development plan; and, the policy requirements of the NPPF, great importance is placed on understanding the nature, extent and level of the significance of the heritage asset.

The revised NPPF (February 2019) sets out in Chapter 16, the core principles relating to development affecting Heritage Assets that local planning authorities should consider in making planning decisions in the following paragraphs:

184. Heritage assets range from sites and buildings of local historic value to those of the highest significance, such as World Heritage Sites which are internationally recognised to be of Outstanding Universal Value. These assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations.

189. In determining applications, local planning authorities should require an applicant to describe the significance of any heritage assets affected, including any contribution made by their setting. The level of detail should be proportionate to the assets' importance and no more than is sufficient to understand the potential impact of the proposal on their significance. As a minimum the relevant historic environment record should have been consulted and the heritage assets assessed using appropriate expertise where necessary. Where a site on which development is proposed includes, or has the potential to include, heritage assets with archaeological interest, local planning authorities should require developers to submit an appropriate desk-based assessment and, where necessary, a field evaluation.

190. Local planning authorities should identify and assess the particular significance of any heritage asset that may be affected by a proposal (including by development affecting the setting of a heritage asset) taking account of the available evidence and any necessary expertise. They should take this into account when considering the impact of a proposal on a heritage asset, to avoid or minimise any conflict between the heritage asset's conservation and any aspect of the proposal.

191. Where there is evidence of deliberate neglect of, or damage to, a heritage asset, the deteriorated state of the heritage asset should not be taken into account in any decision.

192. In determining applications, local planning authorities should take account of:

- a) the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation;
- b) the positive contribution that conservation of heritage assets can make to sustainable communities including their economic vitality; and
- c) the desirability of new development making a positive contribution to local character and distinctiveness.

Policy CS11 of the Core Strategy 2011 states that planning permission will be granted for development that:

Protects and where appropriate enhances the borough's statutory and non-statutory heritage designations by appropriately managing development in or adjacent to conservation areas, listed buildings, scheduled ancient monuments, historic parks and gardens, archaeological sites, buildings of local historic or architectural interest.

Policy CP16 (1a) of the Core Strategy 2011 states 'Planning permission will be granted for development that is designed to a high standard, which helps to create places where people want to live, work and relax. All development should demonstrate that its design:

Identifies and responds positively to existing features of natural, historic or local character within or close to the proposed development site.

Policy DM20 of the Allocations Plan 2014 states that development proposals must conserve and enhance the historic assets of Havant'.

Assessment

The single storey extension and glass balustrade is of a design and size that would not cause any adverse impact on the character of the Conservation Area. It would also be in keeping with existing property and would not appear overly dominant.

Alterations to the fenestration also sit comfortably on the host building improving the appearance overall.

In consideration the proposals would preserve the character of the conservation area and the existing dwelling and is considered acceptable

1. No work shall commence until new external window and door details have been provided. Such information to comprise: - 1:20 plan, section and elevations shown in context with the

opening within it is set. Details of finishes and the method of opening to be provided. The details shall be submitted to and approved in writing by the local planning authority and thereafter carried out in full accordance with such approval and be retained thereafter

Reason: In order to safeguard the building's special architectural and historic interest.

2. Material samples to be provided and agreed in writing by the local planning authority.

Reason: In order to safeguard the building's special architectural and historic interest.

Conclusion

No objection

Peter Fellows
