

Item 3. New Door details.

All internal doors are original. I have reused all the original doors throughout.

All door architrave is exactly the same. I took samples of the door mouldings to my carpentry workshop (William George Group) and new cutters were made to replicate the original design and new

mouldings were run off. Please see following photos showing the doors and mouldings.

Item 4. Skirting.

The Skirting will be almost the last item of Carpentry to be laid down as these cannot be fixed in place until the underfloor heating and the floor covering have been laid.

An original piece of the Skirting board it with the carpentry workshop, so again I can match up what was originally inlaid.

The Skirting on the central staircase I have also copied the original moulding as this was in a pretty poor state.

Item 5 Covering of Walls & Ceilings in Landing / Attic rooms.

The covering of these areas will only be breathable white paint, no wallpaper will be applied.

Item 6 Floor covering of Inner hallway.

This has yet to be decided. I have samples of a wooden floorboards and Floor tiles but again, this will be one of the final jobs to be done on the house as this is the major walkway area and with builders

around likely to be damage.
