Dear Sir/Madam,

Erection of a flexible power generation facility with associated ancillary infrastructure, access and boundary treatment at Power Generation Facility, Southmoor Lane, Havant PO9 1JW.

Thank you for consulting Hampshire County Council (HCC) as the mineral and waste planning authority (MWPA) with regards to the above application.

The proposed development lies within the mineral and waste consultation area (MWCA) – Sites section.

It lies adjacent to the safeguarded site Budds Farm Wastewater Treatment Works operated by Southern Water Services Limited.

This area is informed by the safeguarded sites list as defined through **Policy 26: Safeguarding – waste infrastructure** of the adopted Hampshire Minerals and Waste Plan (2013) (HMWP).

The purpose of this policy is to protect current and potential waste sites from pressures to be replaced by other forms of development, including through ‘encroachment’ where nearby land-uses impact their ability to continue operating.

It is often the case that appropriate buffers and mitigation measures can make potential nearby development compatible. Any mitigation measures would need to be undertaken by the proposed non-waste development and reduce potential impacts to and from the safeguarded site to levels that would ensure the safeguarded site could continue its intended waste use.

Director of Economy, Transport and Environment
Stuart Jarvis BSc DipTP FCIHT MRTPI

Usually the mitigation measures would need to focus on impacts such as noise, dust, visual impact, odour and traffic movements. They can take a variety of forms, including landscape design, tree planting, barriers, building design and orientation and use of different building materials (such as double glazing for windows).

The appropriate mitigation measures are best informed through direct discussions with the operator of the safeguarded site as they will be most aware of operational requirements. However, HCC is also available for further discussions, as well as facilitation, if required.

In the unlikely event that it is not possible to agree appropriate mitigation measures, HCC would be seeking evidence that the waste management capacity can be relocated or provided elsewhere and delivered.

Further information on safeguarding and Hampshire County Council's approach to it is available in the adopted Minerals and Waste Safeguarding in Hampshire Supplementary Planning Document, which can be found on our website:
