Dear Sirs

The Town and Country Planning Act 1990 - Section 211
Site Address: 17 Pelham Terrace, Emsworth, PO10 7JB
Proposal: Fell 1 No. Eucalyptus (T1 on plan) within
conservation area of Emsworth

The proposal above is very acceptable to me as I live next door. It is an unsuitable tree for any small garden, it is about 70 feet tall & can be seen from the road outside the house by about 2 feet. I have spoken to a well-known tree surgeon in Emsworth who reports that it is a probable danger to the roof of the house if left to grow, the roots will probably lift the paving slabs in the garden & the entrance to the back property, eventually. It may lift the paving on my property.

The tree drops a very large number of red leaves through May, June and July on my garden & I have to remove these twice a week all through summer and dispose of them. I am a keen gardener. The fact that the amount of leaves appears to grow larger every year & dead wood increases on the tree annually leads me to assume it is slowly dying from lack of nutrients.

I look forward to the tree being cut down as
I think in the future it could prove dangerous.

Yours faithfully

Christine Howell (Mrs)
