

T1 - Horse Chestnut

We would like to reduce the height by 7 metres from 16 metres below the suspicious looking wounds full of holes.

We would like to reduce the overweighted limb over the road by 4 metres from 10 metres and crown lift to 6 metres from the ground.

T2 – Yew

We would like to reduce the width of this by 3 metres from 9 metres leaving 6 metres, this is to prevent it covering the flower beds and allow the tree to fill in.

T3 – Hawthorn

We would like to remove this tree as it is suppressed and will not have the chance to improve.

T4 – Beech

We would like to reduce the height by 6 metres from 18 metres leaving a finished height of 12 metres.

We would like to reduce the width of the tree from 9 metres by 2.5 metres leaving a finish of 6.5 metres.

This is to attempt to re balance the tree.

T5 – Cherry Plum

We would like to reduce the height from 7 metres by 5 metres leaving it at 2 metres. This is due to the poor condition of the tree.

• **T6 – Magnolia**

We would like to reduce the height by 1.5 metres from 8 metres leaving a finished height of 6.5 metres.

We would like to reduce the width of the tree from 8 metres by 3 metres leaving a finish of 5 metres.

This is to maintain the tree taking it back to its previous pruning points.

~~**T7 – Sycamore**~~

~~We would like to crown lift this to 6 metres from the ground to keep it clear of the road.~~

• **T8 – Elder**

We would like to reduce the height by 2.5 metres from 9 metres leaving a finished height of 6.5 metres.

We would like to reduce the width of the tree from 8 metres by 3 metres leaving a finish of 5 metres.

This is to prevent it out growing its space.

• **T9 – Laburnum**

We would like to reduce the height by 2.5 metres from 9 metres leaving a finished height of 6.5 metres.

We would like to reduce the width of the tree from 9 metres by 2 metres leaving a finish of 7 metres.

This is to prevent it out growing its space.
