

We have received the recent plans and upon review we are still unhappy.

Our concerns have still not been considered. Regarding the extension to the side of the property, our light will still be restricted and it has come to our attention that the roof on the existing garage is asbestos. If this goes ahead we are fearful for our safety as the garage is on our boundary line.

As for the two proposed velux windows even without the dormer, will still look directly into our garden resulting in a complete invasion of our privacy.
