

East Elevations

1 : 100

Proposed West Elevations

This architectural drawing illustrates the proposed west elevations of a building. The structure features a gabled roof on the left side and a flat roof on the right side. The gabled section includes a dormer window. The flat section has a large rectangular window. A car is parked in front of the building, and trees are sketched on the left and right sides.

This architectural drawing shows a side elevation of a building. The main structure is a two-story rectangular volume with a flat roof. A prominent horizontal band of windows is located on the upper floor, consisting of three distinct window units. Each unit features a large, angled glass pane. Below this, a lower section of the building is visible, characterized by a sloped roofline on the left and a series of windows on the right. The drawing is executed in a minimalist, line-art style with no shading or color.
