

Thank you for consulting Hampshire County Council's (HCC) Planning Policy Team on the above planning application.

While HCC, as the Minerals and Waste Planning Authority (MWPA), does not object to the proposed development, we would like to bring the following to your attention.

The proposed development title refers to the use of 'inert clean soil material', while the Design and Access Statement (DAS) uses the term 'end of waste' imported inert sub-soil material. It has been assumed that the wording used in the DAS refers to screened soil, this type of material can have a highly variable quality depending on the source and as such may not be appropriate for use underlying a sports pitch. It is therefore advised that clarification is sought regarding the material type intended to be used for the level raising and that this material should be suitable for use in sports pitches.

If you have any queries please don't hesitate to contact the Planning Policy Team.

Many Thanks

Andy Denton *BSc. (Hons) MSc. AMIEnvSci*
