

Statement of Operation

The idea is vehicles will pull into the site and select either a full valet/ In and out [Right Hand Lane] or just the outside [Left-hand Lane] they will proceed slowly forward as directed by staff. All Vehicles will proceed through the initial wheel wash and pre-spray then on to the washing area. The vehicles in the right-hand lane will then pull in to the hoovering bays to have the interiors done and will then be directed out by staff. Vehicles in the left-hand lane proceed back out on to the road and away. The Bays in the middle are for people who want to leave their cars and offer overflow for the Hoover bays. As with all car washes, Engines on or off is a personal choice.
