

Hello David
Hope your keeping well

Further to your recent email, I have looked again at the conditions and would suggest the following:

Condition 3 - I now propose to use white PVCu windows, fascia, soffit and barge boards.

Condition 4 - If you refer to the A3 site plan you will note we have included a strip 600-900mm wide to prevent migration of the pea shingle. In addition we have now included some landscaping adjacent to the front fencing and adjacent to the dwelling. This is shown on the A3 site plan.

Condition 5 - Noted.

Condition 6 - Again please refer to the A3 site plan and you will see the existing levels highlighted in a blue box and the proposed FFL also indicated.

Condition 7 - Noted.

Condition 12 - Please refer to the A4 site plan, you will note that we have shuffled things round to provide parking for two site operatives on site. Clearly this will require management of site deliveries but this is not impossible to do.

Also attached are the manufacturer's details of a new facing stock brick. roofing tile and the vertical tile hanging tile which we would like to use on the front dormer, bay window gablets and the side first floor gables as indicated on the A3 elevations.

If you would like anymore information then please contact me. I am keen to place orders for the bricks and roof tiles as there is a long lead in time.

Regards

Jody Howard
