

Heritage Statement

A survey by SKY was carried out to find the best operating position based on:

- 1/ Not to be fixed to house or roof
- 2/ Not to be viewed from the road front or side
- 3/ To be located low down (if possible)

Placing the Dish on a pole or slab could NOT be achieved given the Satalite position in the sky also, the angle required in the garden meant it would be 30mtrs down the garden and would not be suitable for the cable run underground.

The position between the house and garage means that it is hidden from view thus not affecting the character of the property.
