Dear Sir/Madam,

Proposal: Garage conversion to residential annex for use of main dwelling.
Site: APP/20/00425: - Laburnums, St Peters Road, Hayling Island, PO11 0RT.

Thank you for your letter dated 04/06/2020.

Please find attached a plan of the sewer records showing the approximate position of a public foul sewer within the site. The exact position of the public sewers must be determined on site by the applicant.

Please note:

- The 150 mm diameter gravity foul sewers requires a clearance of 3 meters on either side of the gravity sewers to protect it from construction works and to allow for future access for maintenance.
- No development or tree planting should be carried out within 3 meters of the external edge of the public gravity sewer without consent from Southern Water.
- No soakaway, swales, ponds, watercourses or any other surface water retaining or conveying features should be located within 5 meters of public sewers.
- All existing infrastructure should be protected during the course of construction works.

Furthermore, it is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site.

Southern Water requires a formal application for any new connection to the foul and surface water sewer to be made by the applicant or developer. We request that should this application receive planning approval, the following informative is attached to the consent:

A formal application for connection to the public sewerage system is required in order to service this development. Please read our New Connections Services Charging Arrangements documents which has now been published and is available to read on our website via the following link:
southernwater.co.uk/developing-building/connection-charging-arrangements

The disposal of surface water from this development shall follow the hierarchy within Part H3 of Building Regulations:

- a) An adequate soakaway or some other adequate infiltration system.
- b) A water course.
- c) Where neither of the above is practicable: a sewer.

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119).
