

19 June 2020.

Dear Sir

I really have to complain about recent planning permissions granted which do not make sense to me.

In recent months the property at 8 Upper Bere Wood, Waterloooville, PO7 7NQ, has under gone substantial extensions, more are still planned.

The property no longer fits into the surrounding area. It is too high, with attic converted bedrooms above. It has had a very large "white conservatory", now erected, not "brown" blending in with all other local properties. The conservatory base is about 8 feet above the rear garden ground level, on top of a large concrete base, to the rear of the garages. Had it been at garden level it would have looked okay. with the top being just above the garden wall. As a result of this building we can no longer view the whole road.

When in 1989 we moved into our property the Council / Keydell rules were made very clear to us, only brown window frames could be installed in the Bere Wood.estate homes.

No large vehicles i.e. "caravans" could be parked on the driveway.

We now have what appears to be a block of flats in an area of 3 and 4 bedroom houses totally dominating the road.

The strip of land to the rear of 8 Upper Bere Wood is owned by all Lower Bere Wood home owners and cannot be built on to keep the area pleasant for all to use.

Please look into this matter soonest and advise what can be done and why permission was granted?
