

Please see my original comments about this development. Changing the amount of flats from 9 to 7 changes none of my concerns. I still strongly object mainly on the grounds of the extra traffic making it unsafe for everyone especially children. By changing this development by 2 flats makes no difference to my worries and concerns. How can a builder be allowed to do this and ruin the area and make it unsafe for people and children who have to use this road everyday. This has to be taken down to a much smaller scale if at all, the present building is in good condition and has tenants in at the moment this is purely a money making scheme on the builders part. Why does this property have no sign on the gate to say this is happening, it's bad enough that the parents using the school don't know about this new situation, due to schools being closed.
