

Hi Selina,

On the basis that the plans have now been amended to retain some of the rear boundary wall and that the agent has confirmed that an oak, not a steel beam will be used, I can now support the application (APP/19/00907)

Please can the Acolaid description be altered to remove the reference to the supporting steel. E.g. 'Removal of part of internally contained original rear wall and insertion of supporting oak beam'

Kind regards

Rachael
