APPLICATION APP/17/00207 – Construct Vehicle Track on Land at Tournurbury Farm

Dear Mr Weaver

With reference to your letter of 2nd January here is the additional information you require.

1. The fee of £116.00 has been paid
2. Following consultation with a drainage expert, the drainage layout has been changed to cater for the low-lying area thereby eliminating any risk of runoff of surface water, should this occur. The road construction itself, being of porous material should prevent any run-off.
3. The aggregate specifications and tests are hereby enclosed, plus a sample of the road plainings that could be used. The colours would be either black or grey
4. The planting of the hedge row would be a staggered double row protected by a stock fence. The height of planting will be approx. 600mm Whips. The Oaks approx. 1000mm. It is intended to plant on the eastern side only as the western side has an existing, established hedge already.

Hopefully this will satisfy the requirements you have asked for to start the track construction.

If you need to contact me about anything then my mobile is 07710850579

Yours sincerely

Grahame Phillips

A handwritten signature in purple ink, appearing to read 'G Phillips'.
