

APP/20/00460 – 24 Angus Way Photos

Photo 1: Front

Photo 2: Front of house including neighbouring properties

Photo 3: Looking out to the garden from the current patio doors (which would go into the conservatory). The door is to the garage and the gate is to the carport.

Photo 4: Looking out to the garden from inside the patio doors (will be looking out to conservatory):

Photo 5: Looking back at the house from the very rear of the garden (conservatory to go in the back right corner on this view):

Photo 6: Looking back at the house from the opposite back corner of the garden:

Photo 7: Closer view of proposed area for conservatory (water butt and planting to be removed, conservatory wall to sit to the left of the existing drainpipe to allow roof overhang to remain within my boundary and not to have to do significant plumbing work):

Photo 8: Side elevation. View from here would be the bifold doors:

Photo 9: Diagonal view of garden (north east) as if I were stood in the south west corner of the conservatory):

Photo 10: Wider angle of side elevation
