Dear ,

Bus Shelter A038, Hambledon Road, Waterlooville

Replacement of existing double-sided advertising display unit within Bus Shelter containing integrated internally illuminated 6-sheet displays with a double-sided advertising display unit containing one integrated digital display and, on the reverse side, an integrated internally illuminated 6-sheet display.

Whilst Highways Development Planning raises no objections in regard to the replacement advertising panel a formal objection is raised in regard to the relocation of the bus stop as shown on the submitted plans.

The existing bus stop is served by a bus layby, thus allowing buses to pull off from the main carriageway. The relocation of the bus stop would result in buses having to wait on the running carriageway for passengers to embark/disembark at a detrimental impact the free-flowing nature of the carriageway.

Whilst this in itself may not always be a specific issue, no assessment or information has been provided in support of the application to demonstrate why the proposal is required in this regard which would be a net disbenefit in highways terms to that of the existing arrangement.

In line with the above, Highways Development Planning raises an objection to this proposal.

*Director of Economy, Transport and Environment
Stuart Jarvis BSc DipTP FCIHT MRTPI*

It should be noted that the application itself makes no mention of a change in location to the bus stop, however a change in location is shown on the submitted plans

Yours sincerely,

Alistair McMurray
