

Your Ref APP/18/00234

Dear Mr. Eaves

Thank you for your letter of 23rd April

I have looked at the documents on line and nothing I have read stops my concern that the proposed buildings are too high. I realize that not all of the building will be 9 storeys high but any part over 4 storeys is too high. The centre of Waterloooville is on a hill and if the centre included a 9 storey building it would stand out as a monstrosity. Waterloooville doesn't have many attractions. The Church is the only pleasant looking place in the town so please don't detract the simplicity of the Church by a monstrosity. The highest building in Waterloooville is, I believe, 4 storeys high and that is quite tall enough.

If planning permission is given for such a high building it would set a precedent and we do not want Waterloooville to become such an eyesore and as overpowering as Portsmouth.

I hope the fact that the development company are offering £60,000 to improve cycleways (will it really cost that much?) will not sway the committee's mind.

I still oppose the application on the grounds of the height of part of the building.
