- The gravity public foul sewer requires a clearance of 3 meters on each side of the sewer to protect it from construction works and to allow for future access for maintenance. No development or tree planting should be carried out within 3 meters

of the external edge of the public sewer without consent from Southern Water.
-No soakaway, swales, ponds, watercourses or any other surface water retaining or conveying features should be located within 5 meters of a public sewer.

-All existing infrastructure should be protected during the course of construction works.

It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site.
