

Tree Protection Statement- Erection of Pergola in Rear
Garden. 33 Church Road, Hayling Island

The pergola is an Oak-Framed structure with the posts supported off a brick-clad, concrete slab base.

The base is on the site of an old air-raid shelter and coal bunker and did not incorporate excavations for foundations that might have affected tree roots.

The Timber frame was fabricated away from the trees and then erected in its current position.

The area around the base of the tree was cleared when I first acquired the site and has now been provided permeable landscaping. The tree appears to be benefiting from these works.

Kenn Wilson
