

St James Road is a road with many double and single yellow lines and residents parking. This results in a staggering amount of pavement parking making it difficult and dangerous for residents who are often elderly and wheelchair or frame dependent. Also some mums with infants in prams.

The erection of two four bedroom properties at 1A St James Road will generate several more cars even if there is some off street parking, the properties are likely to own more than one car and have others visiting. Please consider smaller properties that will generate less vehicles and pollution.

The property has also had several trees removed, again , this is not eco friendly. It has exposed nearby properties thus removing their privacy. They will now be prominently overlooked .

Thank you for your consideration,
