

Morning Lewis

I've reviewed the latest report and am pleased to say that it demonstrates that the acoustic treatment identified will provide sufficient noise mitigation to ensure a suitable internal acoustic environment in the dwellings as described.

I note that the report also now states that the internal arrangements will be carefully orientated to avoid sensitive rooms being located on noisy facades as far as possible.

Can we condition the requirement to install glazing and associated ventilation as specified in the report to ensure that the development does go ahead as per the detail here please. Similarly the layout should be optimised both externally and internally as per the detail here.

I'm not working now until Monday but hope this is enough for you to proceed with for now.

Thanks Lewis

Best regards

Charlotte
