No objection, subject to securing mitigation

Solent Recreation Mitigation Strategy – no objection subject to condition

This application is within 5.6km of Chichester and Langstone Harbours SPA and will lead to a net increase in residential accommodation. Natural England is aware that Havant Borough Council has adopted a planning policy to mitigate against adverse effects from recreational disturbance on the Solent SPA sites, as agreed by the Solent Recreation Mitigation Partnership (SRMP). The Appropriate Assessment has taken this into consideration, therefore, providing the appropriate mitigation is secured by any approval, Natural England are satisfied that the applicant has mitigated against the potential adverse effects of the development on the integrity of the European site, and has no objection to this aspect of the application.

Nutrient neutrality – no objection

The Appropriate Assessment has considered the potential for impacts on the Solent European Designated sites and concluded that, as there will be no increase in dwellings proposed, there will be no potential impact. Natural England are satisfied that there are no potential adverse effects of the development on the integrity of the European site, and has no objection to this aspect of the application.

Kind regards,
Emily

We are here to secure a healthy natural environment for people to enjoy, where wildlife is protected and England's traditional landscapes are safeguarded for future generations.

In an effort to reduce Natural England's carbon footprint, I will, wherever possible, avoid travelling to meetings and attend via audio, video or web conferencing

Natural England offers two chargeable services – The Discretionary Advice Service ([DAS](#)) provides pre-application, pre-determination and post-consent advice on proposals to developers and consultants as well as pre-licensing species advice and pre-assent and consent advice. The Pre-submission Screening Service ([PSS](#)) provides advice for protected species mitigation licence applications.

These services help applicants take appropriate account of environmental considerations at an early stage of project development, reduce uncertainty, reduce the risk of delay and added cost at a later stage, whilst securing good results for the natural environment.
