

im looking at moving my fence to my boundary line as shown,
I own the land marked in Red.

The fence will be 6ft height from the ground level

There is a gate already on the existing fence line I would like to move that to the same line as the fence. There is already a paved walk way so will not need touch that.

new fence will be concrete posts concrete gravel boards with 6ft timber fence

fence line to go from front of garage door to prevent blind spot and keep good visibility splays,
