

In the transport document it is stated that there was a car parking survey completed and it found that the additional vehicles would be able to use the adjacent car park as this is unrestricted. This is not true. This car park has a maximum stay of 24hrs. That means all vehicles must leave the car park within that time.

The parking survey was carried out on a Wednesday and Thursday at 1am, 9am 7pm which does not reflect the current users parking habits.

This car park is currently under review and may have the 24hr restriction reduced.

If this is permitted there isn't inadequate parking provision on site for all users and visitors at all times of the day and this includes weekends which is the busiest time for the car park.

The adjacent public car park is not suitable for any long stay parking or nor does it have the capacity to accommodate anymore vehicular movements this development may put on it.
