

Tree & Root Protection

80 Buckland Close, Waterloooville

The Root protection area should be marked out using an 10-meter radius from the tree

As this is not a commercial build, 1.8m Herras fencing would be a little excessive. Orange plastic netting would be more than suitable to mark out the root protection area.

The root protection area is to be installed for the duration of the project. The zone should also be monitored during construction on a regular basis to ensure it has not been moved, entered or used for any soil deposition or storage during this time.

In order to facilitate the construction of this project, the materials used should be stored away from the designated root protection area and access.

The fencing should be also marked out as an RPA by signage such as in the example below.

CONSTRUCTION EXCLUSION ZONE

KEEP OUT!

THE FOLLOWING MUST BE OBSERVED BY ALL PERSONS:

THE PROTECTIVE FENCING MUST NOT BE MOVED
NO PERSON SHALL ENTER THE PROTECTED AREA
NO MACHINE OR PLANT SHALL ENTER THE PROTECTED AREA

NO MATERIALS SHALL BE STORED IN THE PROTECTED AREA

NO SPOIL SHALL BE DEPOSITED IN THE PROTECTED AREA

NO EXCAVATION SHALL OCCUR IN THE PROTECTED AREA

**ANY ACCESS INTO THE PROTECTED AREA MUST BE WITH THE
WRITTEN PERMISSION OF THE LOCAL PLANNING AUTHORITY**
