Material: Steel
Gear Type: Security Shutters

The **Securvision 800** security shutter possesses a strong extruded aluminium profile making it suitable for retail, office and commercial applications. It offers an impressive 62% vision when fully closed allowing retail outlets to maximise both vision and security within the premises.

The Securvision 800 can also be mixed with solid profiles such as the optional clear polycarbonate insert option. This enables the Securvision 800 to maintain its 62% visibility whilst offering external weatherproofing and a physical enhancement the security of the shutter.

The slats are available both fully and partially punched, with a polycarbonate glazing insert option.

The major strength of the Securvision 800 is its ability to meet the demands of crime fighting whilst offering a very minimal visual obstruction to window shoppers. Due to the distinctive high levels of visibility it offers, many premises searching for a less confining security outlook find comfort in the Securvision 800.

The Securvision 800 can have 2 operation function. These are spring & lock operation and electric operation.

The Securvision 800 uses the UPH 250 guide rail. The UPH 250 is recommended for wider shutters with higher security requirement with 250mm, 300mm or 350mm box. It consists of extruded aluminium with an integral box section for reinforcement and to facilitate fixing. It also has a high density 4mm or 7mm pile brush for quiet and smooth operation. The dimensions are 90mm wide x 34mm deep. This guide rail on the Securvision 60 is available in the stock colours of white, black, cream and brown.

FOR RETAIL USE

The Securvision 800 delivers upto 58.5% vision. This is ideal and almost a necessity for most retail outlets wishing to flaunt their assets whilst out of opening hours. Available for alternative use as both a bar and kiosk, it is the perfect shutter wherever permanent vision is required.

SLATS

Construction: Securvision 800 is a single skin extruded aluminium slat.
Common Use: This shutter delivers see-through protection demanded by many local authorities for established high streets and modern shopping centres. This shutter is mainly designed for retail premises.

Vision: 150mm x 55mm panel offers upto 58.5% vision.

Dimensions: Nominally 77mm high x 18mm wide.

Weight: 9.25kg per square metre (without vision)

Stock Colours: White, black, cream and brown. Bottom slat - white and dark brown.

SHUTTERBOX

Construction: The Securvision 800 has roll formed aluminium in the top two sections, top and bottom boxes. Bottom box removable for installation and maintenance and chamfered at 45°.

Box Ends: The shutterbox is assembled on die cast aluminium plates.

Box Sizes: Clear opening height (to underside of box):

2150mm, box size 250mm

2900mm, box size 300mm

Finishing: External shutters require a silicone seal between the shutter, on the wall along the top box and down the side of the guide rails.
