7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

- (i) Principle of development
- (ii) Impact upon the character and appearance of the area
- (iii) Impact upon residential amenity

(i) Principle of development

The application site is situated within an urban area where further development is considered acceptable subject to the usual development control criteria.

(ii) Impact upon the character and appearance of the area

The proposed replacement of the communal front and rear entrance doors are visible from the public realm, they will be of the same height and width. The colour to be used will be of similar appearance as to the existing front and rear entrances. The development is therefore not considered to have a significant adverse impact on the character and appearance of the property or area.

(iii) Impact upon residential amenity

The effect upon the residential amenity would be minimal and have no negative effect on the residential amenity.

8 Conclusion

The resultant appearance would respect the context of the area and comply with Policy CS16. The proposal is therefore recommended for permission.
