

I would also like to raise the concerns as to the building being so close to my border fence. Will they be wanting to put scaffolding in my garden? and also the pipe work and facias will they overhang into my garden. I feel that having this new building here will most definitely make me feel hemmed in and overshadowed. I'm also sure this is a flood 3 zone and you can't put a new build on it, as it is my garden. Floods bad in the winter months.

I hope you will take my objections into consideration when looking at this application.

With kind regards

S Jennings

Dear Mrs Pickup

With regards to the recent application for planning permission at 16 Selborne Avenue Havant PO9 4PX. I have a few concerns regarding this application.

I myself live on the corner plot of Selborne Ave / Overton Crescent and I can see from the plans that the new intended property clearly backs up to my back garden fence. I have lived in my property for 38 years my back garden is quite small and find that having a new dwelling built here will quite clearly over shadow my light and also I understand from the positioning of the windows it will also invade my privacy as I will be overlooked from the back and side windows.
