

Section 7 Identification of Tree(s) and Description of Works

TP1018 refers to 2 Oak trees growing side by side and close together on the boundary of Age Concern Cowplain and 2c Padnell Avenue.

In 2016 overhanging branches were lopped. These were branches that overhung the bungalow 2C Padnell Avenue and the queueing traffic at the traffic lights, at the junction of Padnell Road and London Road.

Both trunks have now grown exponentially and branches are approximately 3-4 foot away from the Age Concern Cowplain roof and they also overhang the car park.

Branches on the other trunk have also grown and are overhanging again, both 2C Padnell Avenue roof and Padnell Road path and the traffic queueing at the lights.

The crown needs lifting on one side to remove lower branches on the trunk at the rear of the bungalow. The overall crown size needs reducing by approximately 50% in order to reshape the pair of oaks.

This work is needed to maintain a safe environment for elderly people using the Borrow Centre and the general public using Padnell Road path and road. Also to give more light to the residents of 2C Padnell Avenue.
