Protective Barrier

Tree works:
In most situations the tree works need to be carried out before the main contractors works start. The location of each tree by number is shown on the tree protection plan any to be removed are indicated with a red number are crown outline. All tree works must be reassessed before any site activity starts as part of the standard risk management process.

Tree Protection using fencing:
The Construction exclusion zone in the root protection area surrounding retained trees that must be protected from any disturbance by construction activity. All the protective measures should be installed before the start of any site works. No protective measures should be removed or temporarily dismantled during the works. Protective fencing should be installed at the location shown on the tree protection plan by the heavy dashed orange line.

Tree Protection fencing installed.
Sympathetic construction methods
implement when working within this
area.
