Dear Ms Wells.

Re: APP/19/00628

Further to receipt of your communication regarding extending the operating months of the Fishers Caravan Park in Fishery Lane, Hayling Island, Hants. PO11 9NU.

We have resided at the above address since 1984 and during that time we have seen the occupancy period increased from 8 months (March 1st - October 31st inc) to 10 months (March 1st - December 31st inc). Now we are alerted that the owners wish to increase the occupancy to 11 and a half months! Why not a full 12 months, what is the difference, apart from a couple of weeks!

Over the years we have also witnessed the caravan architecture change from fairly unobtrusive flat roof vans to high visibility pitch roof vans which dominate our over boundary fence views. It is because the vans are so close to our boundary and the fact our rear garden is not particularly deep, it has caused us a bit of a visual nuisance over the years, we have had to erect trellis on our rear boundary fence in an effort to partially hide them.

The caravans on the site are exactly that, caravans, not designed to be permanent residential accommodation such as is on St. Herman's Estate in St Herman's Road. January & February are also historically the coldest & wettest months of the year too, so in our view these caravans are unsuitable for use during these months.

Therefore we wish to lodge our objection to any increase in the opening period of the Fishers Caravan Park from its current 10 months.

Yours sincerely.

Paul & Heather Sanford,
