PEGASUS

COMFORT/PREMIUM

Sectional Garage Door

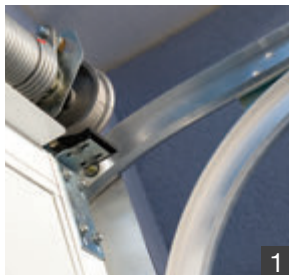

September 2014

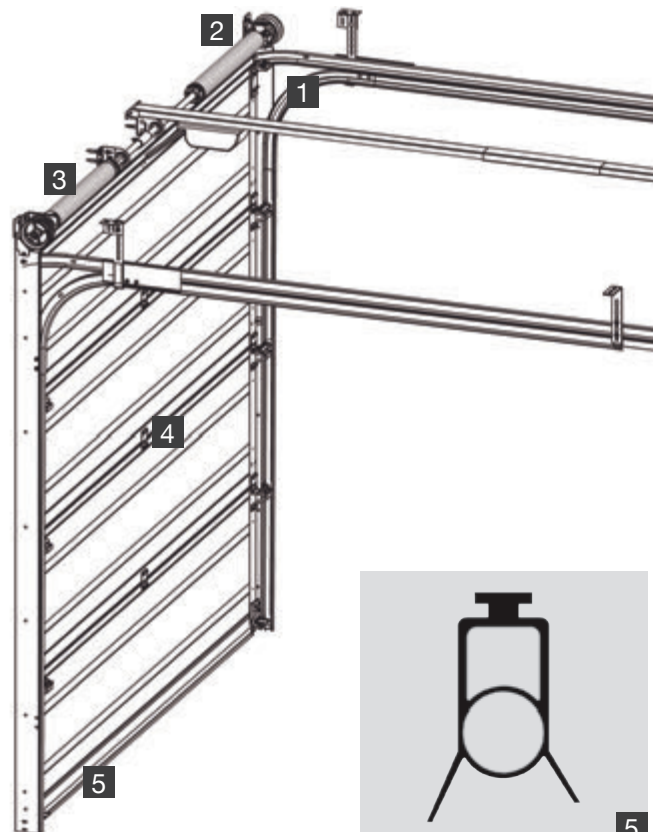

Comfort & Durability

Pegasus sectional doors are designed with an Aluminium frame and rails providing safe operation and much better aesthetics than galvanised steel.

RESISTANCE

Rails manufactured in extruded aluminium 2.5mm for protection against corrosion and almost silent operation.

DURABILITY

Method of weight compensation using torsion springs equipped with a ball bearing system. (25,000 cycles)

SILENCE

Rollers made with Glass fibre and resin for a smooth and quiet operation

WEATHERSEAL.

Seal in very high quality EPDM, it's characteristic shape designed for excellent sealing on the ground. Frost resistant.

ANTI-CORROSION

Stainless steel hinges for optimum resistance.

Motorisation

- For added comfort, the motorised door comes with a Sommer Duo Vision (500, 650, 800 or 1100 Nm). Receiver control unit, radio (868 MHz) with integrated courtesy light.
- Soft start and stop.
- Complete with one 4Chl handset.
- Digicode or fingerprint readers available.

Elegance & Strength

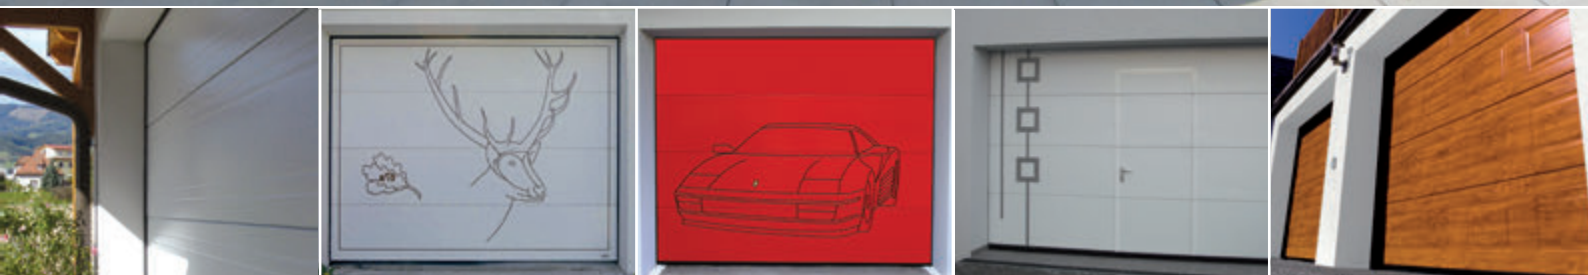

- Insulated aluminium panels, bespoke made to ensure each of the three panels is an equal height (up-to 2250mm high)
- A 2mm outer aluminium sheet provides a smooth finish and a level of high quality no matter how dark the colour.
- An optional 3mm external panel can be specified and milled out to design of your choice.
- A pure design, more corrosion and impact resistant.
