Proposed Development:	To create a Habitat Mitigation Zone for Brent Geese and Solent Waders (linked to the current planning application APP/18/00450). Observations / Comments:

Thank you for consulting Environmental Health on the above application. I have reviewed the application in terms of air quality and noise.

Whilst having some reservations regarding the potential impact on existing residential amenity close to the site from noise due to vehicle movements and dust from the proposed excavation and infill activities, the duration of the engineering work will be short term and therefore any potential impact self limiting. I would recommend that any CEMP required for the site specifically includes details of measures to be employed to control the emission of dust during the creation of the habitat mitigation zone.

Please do not hesitate to contact me if you have any queries or would like to discuss the application.
