This robust and eco-friendly bamboo slat fencing screening roll will make a perfect practical addition to your garden. It is popular as a way to improve existing fencing and frame flower beds. The bamboo is strong enough to increase the height of existing fences. It can be used on its own or attached to an existing fence.

Features

- Versatile design will make for an attractive screen or fence for the garden
- Ideal for disguising existing fencing or walls
- Made from completely natural bamboo which means it is eco-friendly and will ensure durability

Huge discounts for quantity - Next day delivery on all screening

These bamboo slat fencing screening rolls can be attached to existing garden fences, stone walls, chain link wire fencing, arbours and many other areas the garden which requires screening or shade. It can be easily attached to wooden garden fences by the use of galvanised garden staples securing top and bottom of the bamboo slat fencing screening. This bamboo screening is ideal for disguising existing walls and fencing, it can also be used over arbours and pergolas, creating a soft shaded area beneath. It is made from full height bamboo canes, each held together by the use of galvanised wire.

Each roll of screening is made of individual vertical bamboo slats cut from a large cane (each vertical is a complete slat - there are no breaks). The average width of each slat is 15mm (0.6ins), varying from 5mm to 20mm. The slats are tied together with horizontal galvanised wires.

The versatility of this product allows you to use it for a variety of applications around the garden. These include providing shade and privacy, disguising less attractive areas of the garden, such as compost heaps, or to simply add a bit of decoration to your home. This screening has been constructed from completely natural bamboo, which gives the product strong and durable properties that enable it to resist different environmental conditions, including strong winds and heavy rain.

Whether you are going to attach the screening to an existing fence, wall, or arbour, you will need to make sure it is fixed securely. To achieve this, we recommend using our galvanised wire and ratchet strainers.

Dimensions

Height: 1m (3' 3") x Length: 4m (13' 2")
