

Planning App 19/00160 EW comments

What is being asked for?

See Site Plan submitted and Site Plan (EW)

The drawing attached to the Planning Application is in error where it shows the boundary with 9 Hollow Lane and it has no scale and is not to scale.

- T1 Ash: reduce height by 4m and 2-3 m at sides
- T2 Ash: reduce height by 4m and 2-3 m at sides
Remove 3 limbs overhanging
- T3 Sycamore: Reduce crown by 4m and sides by 2-3 m
- T4 Sycamore: Reduce crown by 4m and sides by 2-3 m
- T5 Sycamore: Reduce crown by 4m and sides by 2-3 m
- T6 Sycamore: Reduce crown by 4m and sides by 2-3 m
- T7 Sycamore: Reduce crown by 4m and sides by 2-3 m
- T8 Sycamore sapling: Fell
- T9 Sycamore sapling: Fell

The HBC website shows TPO 107 Area A1 as 4m wide on the property eastern boundary. It also goes across the boundary onto 13A Hollow Lane and 9 Hollow Lane.

If the submitted sketch plan is correct, none of those trees are in the TPO Area A1.

Conclusions

1. No objections except asking to reduce crown does not enable the work to be verified after the event. The reduce crown is a tree surgeon figure for him to estimate the work to be done. Request final height of tree or original height of tree and amount of reduction. Also future submissions are to have an indicated scale

2. HBTW to request permission of the owner of 5 Hollow Land and 9 Hollow Lane to survey the trees on the in the TPO Area and report to Treezilla.

3. Work to be done after the bird-nesting season i.e. 1 Sept
