

FAO Rachael McMurray

Dear Rachael

Planning consultation: APP/17/00863 Appropriate Assessment - Hybrid Application - Full - COU, alterations to & extension of existing buildings to 20 Residential units. Outline - demolition of 1983 office building and associated brick & glass corridor link & development of up to 70 residential units etc. Southleigh Park House, Eastleigh Road, Havant PO9 2PE

Thank you for your consultation on the above dated 19th July 2018.

Natural England has reviewed the Appropriate Assessment. Provided the applicant is fully compliant with the Solent Recreation Mitigation Partnership Definitive Strategy and an appropriate planning condition or obligation is attached to any planning permission to secure the contributions towards this mitigation measure, Natural England is satisfied that the applicant has mitigated against the potential adverse effects of recreational disturbance on the integrity of the European site(s).

Landscape

The proposed development is for a site within or close to a nationally designated landscape namely South Downs National Park. Natural England advises that the planning authority uses national and local policies, together with local landscape expertise and information to determine the proposal. The policy and statutory framework to guide your decision and the role of local advice are explained below.

Your decision should be guided by paragraph 115 of the National Planning Policy Framework which gives the highest status of protection for the 'landscape and scenic beauty' of AONBs and National Parks. For major development proposals paragraph 116 sets out criteria to determine whether the development should exceptionally be permitted within the designated landscape.

Alongside national policy you should also apply landscape policies set out in your development plan, or appropriate saved policies.

The landscape advisor/planner for the National Park will be best placed to provide you with detailed advice about this development proposal. Their knowledge of the site and its wider landscape setting, together with the aims and objectives of the park's management plan, will be a valuable contribution to the planning decision. Where available, a local Landscape Character Assessment can also be a helpful guide to the landscape's sensitivity to this type of development and its capacity to accommodate the proposed development.

The statutory purposes of the National Park are to conserve and enhance the natural beauty, wildlife and cultural heritage of the park; and to promote opportunities for the understanding and enjoyment of the special qualities of the park by the public. You should assess the application carefully as to whether the proposed development would have a significant impact on or harm those statutory purposes. Relevant to this is the duty on public bodies to 'have regard' for those statutory purposes in carrying out their functions (section 11 A(2) of the National Parks and Access to the Countryside Act 1949 (as amended)). The Planning Practice Guidance confirms that this duty also applies to proposals outside the designated area but impacting on its natural beauty.

Local sites and priority habitats and species

You should consider the impacts of the proposed development on any local wildlife or geodiversity sites, in line with paragraph 113 of the NPPF and any relevant development plan policy. There may also be opportunities to enhance local sites and improve their connectivity. Natural England does

not hold locally specific information on local sites and recommends further information is obtained from appropriate bodies such as the local records centre, wildlife trust, geoconservation groups or recording societies.

Priority habitats and Species are of particular importance for nature conservation and included in the England Biodiversity List published under section 41 of the Natural Environment and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of Special Scientific Interest, on the Magic website or as Local Wildlife Sites. List of priority habitats and species can be found [here^{\[1\]}](#). Natural England does not routinely hold species data, such data should be collected when impacts on priority habitats or species are considered likely.

Protected species

Natural England has produced [standing advice](#) to help planning authorities understand the impact of particular developments on protected species. We advise that the standing advice is interpreted for you by your district ecologist, or an equivalent independent party with the necessary expertise. Natural England will only provide bespoke advice on protected species where they form part of a SSSI or in exceptional circumstances.

Kind regards

Rachael Clemson
