Economy Two Tier Rack

Description

Specification

Parking Centres of 305mm

Galvanised steel tube section, bar and plate

Available overground or underground fixing, in many sizes

Optional bolts for fixing together and to the ground can also be purchased

Installation

For underground fixing, a concrete foundation of around 300mm cube is recommended around each leg, depending on the ground conditions. Leg depth for ragged ends is 203mm below ground.

For overground fixing, ensure a suitable surface already exists for bolting on to - preferably this should be onto existing concrete. Leg flanges require 3 12mm bolts per flange.

How much space in the room do I need?

To be comfortable, we advise at least a 1900mm depth and a width of:

3 bikes - 1220mm

4 bikes - 1525mm

5 bikes - 1830mm

6 bikes - 2135mm

7 bikes - 2440mm

8 bikes - 2745mm

9 bikes - 3050mm

10 bikes - 3355mm

Installation

Ensure a suitable surface already exists for bolting on to - preferably this should be onto existing concrete. Contact us about installation, we are able to provide a full installation service.

Typical Lead Times: 2-3 weeks
