

Hello Rachel

As per our earlier telephone conversation, please find an updated materials schedule showing the natural slates for roofing. As mentioned on the telephone, the Audley Red Stock brick is the same type of brick as used on the neighbouring single storey rear extension at no.27 and ties in well with the existing house. The image on the schedule has been updated to a photo I have taken of the brick sample, which I will provide along with the sample of natural slate for your information.

Please feel free to contact me with any questions.

Kind regards
Elliott Vialls
