RECEIVED

Re proposed wine bar
Unit 2.2. St Marys Road

Dear Sir.

1. Parking is currently a major problem with cars and vans left sometimes for weeks on end by people who do not live in this road, the above development would make this situation much worse. With this situation please tell us where these additional vehicles will be parked.
2. Anti social behavior in summer months occurs on a regular basis with younger, loud mouthed, foul mouthed drinkers in the early hours of the morning. As above this wine bar would compound an existing problem.

3. Litter in general is created by an age group of people that would patronise the outlet proposed. With government and council cutbacks this means more beer cans and food wrappers to be picked up by residents. Plus the possibility of damage to our cars and property.
4. Impact on the character, the proposed wine bar would never improve the character and appearance of St Marys Road, in this respect nothing much has changed over the years, please don't let this start now.

For us personally there would be nothing positive in having a wine bar at the end of the road but we would thank all concerned for giving us the opportunity to make our comments.

Yours faithfully.

D. J. Barnes
