Subject: RE: Land South of Bartons Road APP/15/01435 Discharge of Archaeological conditions

Dear David, yes I am happy to confirm that I would not raise any archaeological objection to the discharge of condition 9 (indeed to any of the archaeological conditions) attached to the planning permission. Although the publication of the results may take some while (it must await an available slot in the chosen journal) the provisions for this has been secured. Sincerely, David

David Hopkins
