Shingle	Oysters	Ford	

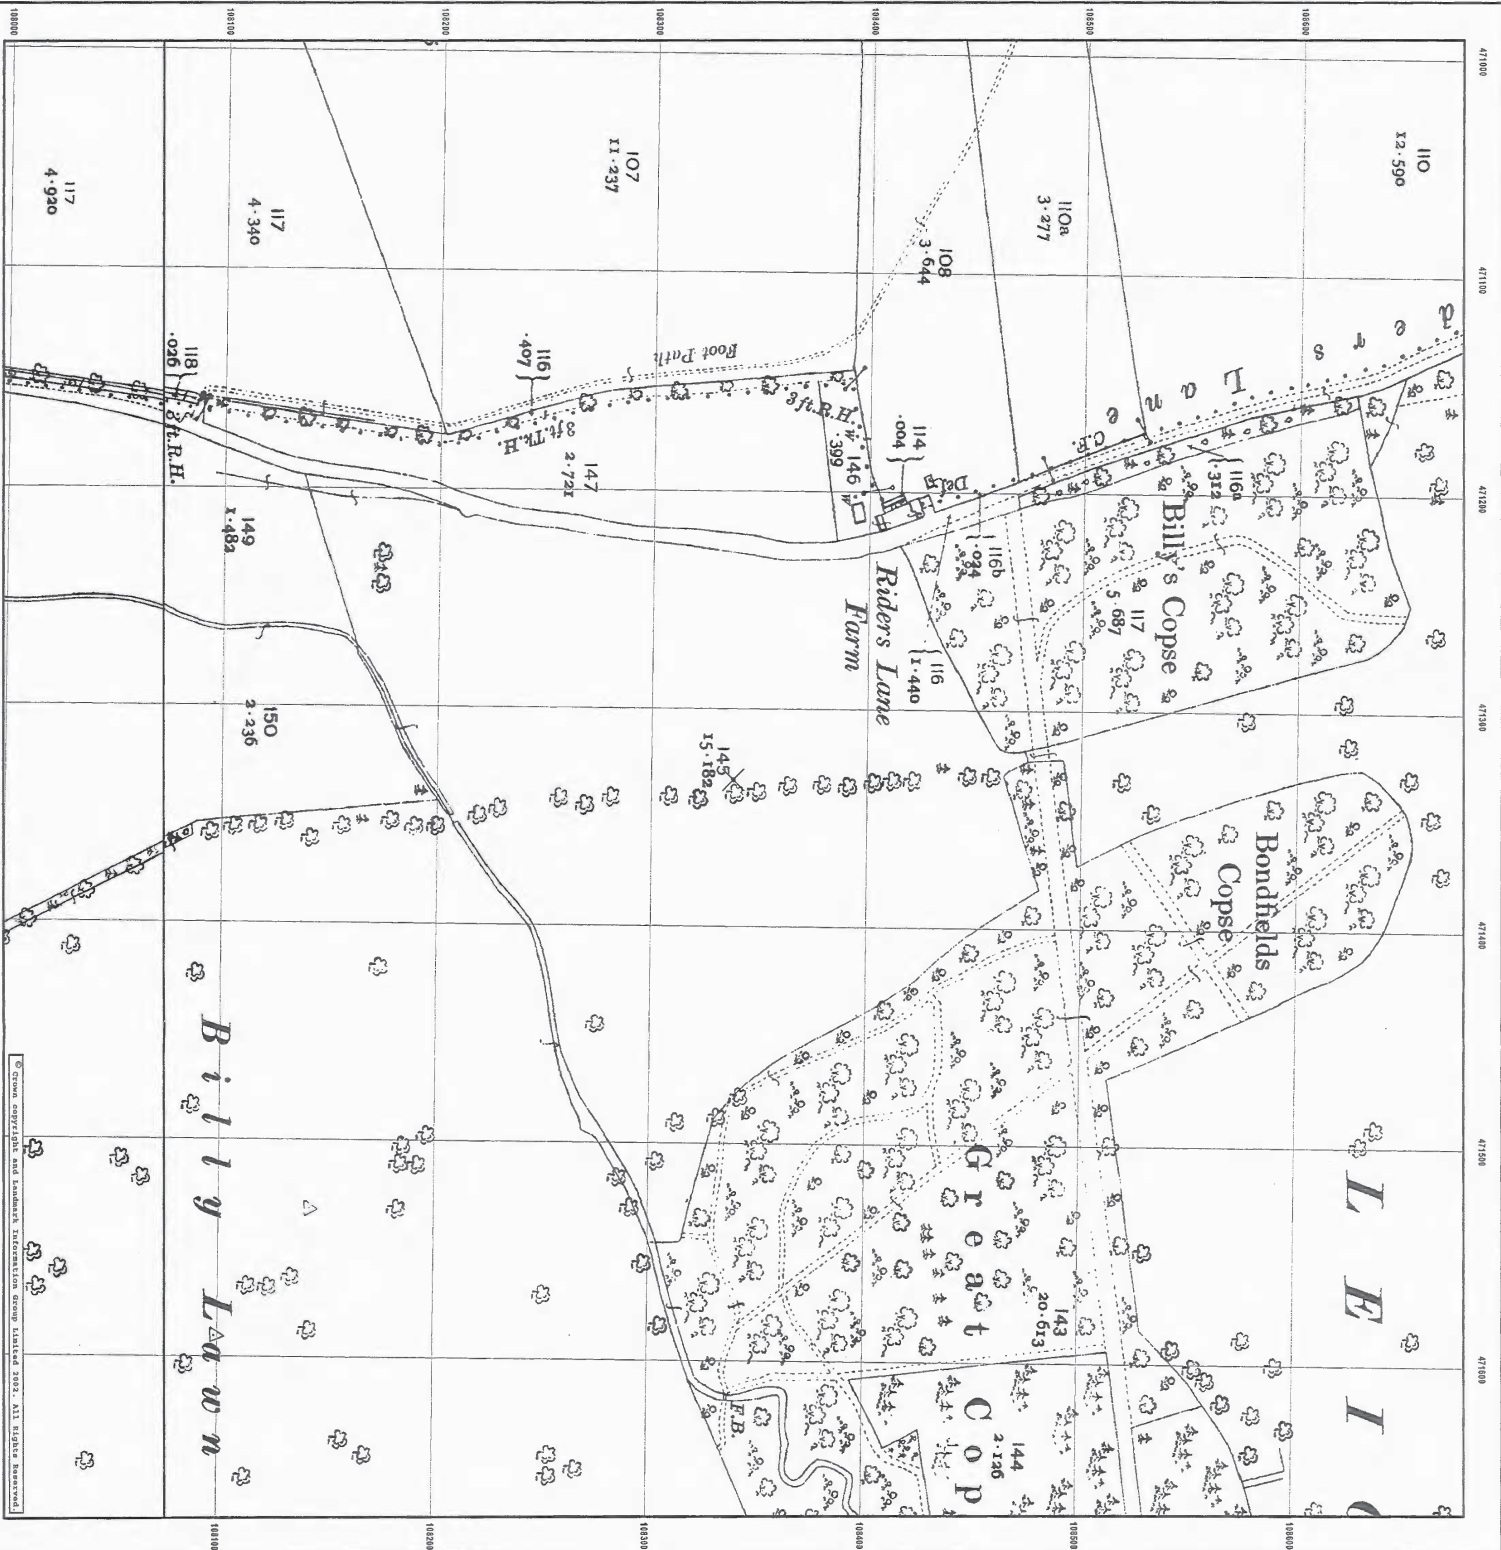

HAMPSHIRE & ISLE OF WIGHT

The historical maps shown were reproduced from the original maps held in the Ordnance Survey archives. The 1:25,000 scale was adopted for mapping urban areas. The published title given on the right is the title of the map on which the map was based. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a particular area being carried out at different times. This can result in significant inaccuracies in surveying areas.

HAMPSHIRE & ISLE OF WIGHT

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey map repository, Southampton, in 1994. The 1:25,000 scale was adopted for mapping within these maps. These maps were used to update the 1:50,000 scale maps of the area. The maps were surveyed in 1938, 1933, 1931, and 1946. The maps were produced using the process continued until recently, with new editions appearing every 10 years or so for urban areas.

ORDNANCE SURVEY PLAN

The historical maps shown were reproduced from the original maps of the Ordnance Survey, which were first published in 1863 and 1864. The 1:25,000 scale was adopted for mapping urban areas, and the 1:50,000 scale was used for rural areas. The maps were produced using the process of lithography, which involved the use of stone and ink. The maps were then printed on paper and bound into a book. The maps were used by the Ordnance Survey to provide a detailed record of the landscape and built environment of the United Kingdom. The maps were also used by the public for navigation and planning. The maps were a valuable resource for the Ordnance Survey and the public alike. The maps were a testament to the skill and dedication of the Ordnance Survey staff. The maps were a valuable record of the landscape and built environment of the United Kingdom. The maps were also used by the public for navigation and planning. The maps were a valuable resource for the Ordnance Survey and the public alike. The maps were a testament to the skill and dedication of the Ordnance Survey staff.

In the late 19th century, a Provisional Edition was produced. This edition was based on the original maps, but it included some changes. The changes were made to reflect the progress of the Ordnance Survey's work. The changes were also made to improve the quality of the maps. The Provisional Edition was a valuable resource for the Ordnance Survey and the public alike. The Provisional Edition was a testament to the skill and dedication of the Ordnance Survey staff. The Provisional Edition was a valuable record of the landscape and built environment of the United Kingdom. The Provisional Edition was also used by the public for navigation and planning. The Provisional Edition was a valuable resource for the Ordnance Survey and the public alike. The Provisional Edition was a testament to the skill and dedication of the Ordnance Survey staff.

ORDNANCE SURVEY PLAN

The historical maps shown were reproduced from maps predominantly sold at the scale adopted for this 1:2500 scale was adopted for mapping urban areas and by 1988, I covered the whole of southern Britain. The published data given on the right is older than any later than the surveyed data. Coastal Projection, with independent surveys of a large county or group of counties, giving rise to significant inaccuracies in scaling areas.
