Hello Lewis

Following a site visit and reading the submitted tree report I offer the following comments.

- The trees are generally of a lower quality, however they offer public amenity value due to their position in the street-scene - there could be some scope to remove these trees as part of the application and to replant with semi-mature species so as to ensure sustainable canopy cover at the property. (The trees are subject of a TPO and this would require an application)
- Should the trees be retained then we would require a tree protection plan and method statement so as to ensure that they not damaged during construction.

Regards
J
