

Good day David

As per your e-mail of 21 January 2019 18:27 to Robin Henderson @ Savilles where-in you included my previous request for additions to the CMS, I note these have now been added, and as such I am satisfied this can now proceed for the access road.

Environmental Health have provided the following comments:

I am happy with the revised additional comments related to the proposed dust control measures on the CMP.

“This plan will include for a suitable and adequate water supply being available at the site prior to works commencing.”

Now addressed under The Site & Main Activities

“It should also be noted that besides the keeping of haul roads damp during dry weather conditions, any areas where tracked excavators, dozers and the like are working, are also be kept damp at all times.”

Now addressed under Mitigation Measures & Procedures (including Emergency Procedures)

Please add these requirements to a final updated CEMP.

Kind regards

Mark Moss
